

First Grade - Goals and Objectives

In first grade, we learn to know God, especially his constant love and forgiveness, to live happily as a member of His family and to be a witness to His love. In reading, students are exposed to a phonetic word attack system and a wide range of quality literature to read. As students grow in their reading abilities, writing and spelling are reinforced. In handwriting, we practice the basic strokes and letters. We learn to appreciate the uniqueness and value of our world and its people. We experience science as a way of exploring the natural world in various ways. Sorting, classifying, shapes, patterns, comparing, ordering, graphing, numbers to 100, measuring time, distance and money, addition and subtraction are all part of the math curriculum.
